Important Things to Remember

The Budget Reform Act of 1994 required many changes. One of the fundamental cornerstones of the Act was the creation of a stable structure for the State budget. Prior to that the Governor had sole authority to determine the content and format of State agency budget requests and the legislature could determine the structure of the appropriations. In addition to being an operationally difficult situation, this often led to conflict over the content and structure of the budget, in addition to the normal conflict of budget issues. The Budget Reform Act resolved that. In fact, one section of the annual appropriations act reinforces the requirement to maintain the budget and planning structures created by the Budget Reform Act. This is the basis for the programs and subprograms used in BUDDIES and AZIPS.

The programs and subprograms are intended to align with the purposes and functions an agency was created to fulfill.

The Arizona Management System (AMS) enhances this structure by specifying strategic initiatives that the Governor and agency directors intend to pursue over the next year to 3 years, and tracking them to ensure success. It fine tunes the direction, planning, and execution of initiatives. AMS is a logical next step in the maturation of the operation of State government.

A. R. S. § 35-122 requires all agencies to provide information relating to the mission, description, goals, performance measures, and funding for all programs and subprograms. The law also requires all budget units that do not report to the legislature or Supreme Court to provide five-year strategic plans for each agency. An agency’s strategic plan must include the following five elements:

1. Mission
2. Description
3. Strategic issues
4. Strategies to address strategic issues
5. Resource assumptions

OSPB is required to publish both the Master List of State Government Programs and each agency’s Five-Year Strategic Plan. Agencies are also required to post their five-year plans on agencies’ websites.

When OSPB publishes the Five-Year Strategic Plans and the Master List, the 5-year plans will contain only the five elements required by statute. However, many agencies produce a five-year strategic plan that includes additional information, such as a long-term vision or goals. An agency can post an expanded version on their website. OSPB’s publication will also contain a link to the agency’s website version.
Here are a couple of commonly confused concepts:

**Strategic Issues** are critical policy or operational challenges that an agency must address to achieve its mission. Strategic Issues are not goals or visions.

**Strategies** describe how the agency plans to address the strategic issues.

OSPB analysts will be assisting agencies in aligning these concepts properly.

A fuller understanding of Mission, Description, Goals, Objectives, and Performance Measures is available in the *Managing for Results* publication on the OSPB website.

**Note for cabinet agencies about using the same performance measures in AMS and AZIPS:**

While each program and subprogram of an agency must contain at least one goal, and each goal must contain at least one performance measure, a performance measure that is used in AMS can also be used as a performance measure for a program or subprogram in AZIPS.

Also, agencies have full discretion to add, delete, or change any goals or performance measures, except for performance measures labeled as “budget” measures. OSPB is statutorily required to identify and collect data on “budget” measures for inclusion in the Executive Budget.
It is highly recommended that all pertinent agency personnel attend the training classes. To register, click one of the links below.

</tbody>
</table>
Although the installation of AZIPS does not require technical assistance, there are some important considerations for the installation of the AZIPS application. **Install AZIPS right away so that it is ready when you are.**

AZIPS is designed for specific fiscal years so it will need to be installed each year.

The installation process creates a desktop shortcut that **must** be used to open the application. This shortcut checks for application updates and will automatically update AZIPS.

The application is composed of two Microsoft Access files. One file contains the data and the other file contains the program. If there is more than one user or computer, the data **must** be located on a network and copies of the program **must** be placed on the local drive of each computer. This configuration is strongly recommended for all installations so your data can be backed up by your IT staff. The installation process guides you through these steps.

**IT Configuration Considerations:**
- Each user must have read/write/execute access to the folder where the data file is stored on the network.
- Each user must have a copy of the application on their local drive with read/write/execute access.
- If the network location is changed in any way, each user will have to have their installation reworked to ensure continued access/connection to the data file. Call OSPB’s System Support at 602-542-5381 if this is your situation.

**User Considerations:**
- Additional users will need to be added to the application so that they will have a properly configured connection to the data file. Do **NOT** re-install the application. The install will tell you how to properly add additional users.
- Users changing computers will likely need to be added as a new user to AZIPS. Call OSPB’s System Support at 602-542-5381 for help.
- All users have full access to the data. The application doesn’t provide different roles/responsibilities for individuals.
- AZIPS lets you share your reports with those who do not have the application installed.

OSPB has prepared an [installation document](#) that provides step-by-step instructions for users without prior experience.
AZIPS has been organized in a hierarchical planning structure. The Update forms are designed so that you can select a planning element at a lower level or return to the parent level from any other level in the planning structure. The requirements for some levels of the planning structure vary depending on the complexity of the organization. The diagram below outlines the planning levels. Plan information is entered at each of the respective levels.

As part of the agency-level plan, the following agency-wide elements are required: mission statement, agency description, strategic issues, strategies, and resource assumptions.

Only for cabinet agencies.

An agency has one or more programs, which may contain subprograms.

Every sub-program (or program with no subprogram) must have at least one goal.

Every goal must have at least one performance measure.

Every agency must have at least one goal, objective, and performance measure. AZIPS is configured for each agency’s programs and sub-programs during installation.

The planning level ‘Objective’ is needed to link Performance Measures to Goals. Many agencies find it helpful to write objectives and have these available for internal (agency) use.
As part of the Program Budgeting mandates, each agency has an identical budgeting and planning structure such that programs and subprograms are based on the mandated (legally-dictated) functions of each agency.

However, several agencies may need to update their budgeting and planning structures if their program budgeting mandates have changed in recent years.

Agencies should notify OSPB by November 1 if structure changes are requested. OSPB will review the request for inclusion in the following year’s budget and planning submissions. OSPB does not undertake structure changes lightly. As part of enacted budget reform, structures were established jointly by the Legislative and the Executive branches to provide a long-term foundation for goals, performance measures, and budgets over time, and are designed to reflect legal mandates. Structures are expected to be maintained over time. However, structures may need updating as state, judicial, or federal mandates change.

The first step in pursuing structure changes is to contact your OSPB analyst.
Note: Similar to last year, cabinet agencies are requested to use their two-page strategic plan summaries as their 5-year plans.

Main Menu

On the Main Menu, clicking the 5-Year Strategic Plan button leads to a page containing two text boxes and a table.

The top box is for the link that can be used to connect to the 5-Year Plan posted on the agency’s website. The lower box is where the title for each of the strategic issues is placed. To add a new issue, click the Add button in the top right corner of the screen.

The table is for entering resource assumptions for fiscal years 2025 through 2027. OSPB will use the budget information provided in BUDDIES as the resource assumptions for fiscal years 2023 and 2024.

Once a Strategic Issue has been created, details about the issue must be entered. Clicking the arrow on the left end of the issue title row will lead to a page for entering details. The issue title will automatically fill the top text box. In the description box, explain in detail the nature of the issue. In the strategies box, outline the approaches planned to deal with the issue.

Strategic Issues

Strategic issues should focus on the key challenges or problems facing the agency. For each issue, agencies will be required to name the issue, give a brief summary of the issue, and outline how the agency plans to address the issue over the next five years.

Strategic issues are often caused by resource limitations, new alliances, customer concerns, audits, inadequate expertise, or other external factors.

Resource Assumptions

“Resource assumptions shall include the number of full-time-equivalent (FTE) positions and budgetary data, including all funding sources categorized by General Fund, other appropriated funds, non-appropriated funds and federal funds that are required to support the strategic plan” (A.R.S. § 35-122). Budget units must provide aggregate agency level FTE and funding information for each fund type for FY 2025 through FY 2027.
Posting the Five-year Plan to the Agency’s Website

The Five-year Plan showing the agency-level mission, description, strategic issues, strategies, and resource assumptions, by fund type, is to be posted to the agency’s website by January 1.

It will also be published and posted on the OSPB website as part of the Master List of State Government Programs and State Agencies’ Five-Year Strategic Plans. The OSPB publication will include a link to each agency’s plan on the agency’s website. Many agencies post an expanded version of their five-year plans on their websites.
The following is a representation of the Arizona Integrated Planning System (AZIPS). All of the forms and reports will be discussed in the instructions that follow.

**Update Plans vs. Explore Plans**

AZIPS has two methods of navigating within the planning hierarchy. The *Update Plans* forms are good for walking through the structure and updating every planning element. The *Explore Plans* form is good for jumping to specific planning elements for update or review.
The top line indicates what version of AZIPS is currently running.

Sometimes when you open AZIPS, it may take a little longer, if there are automatic updates.

Your agency name will appear here.

Exit will close the application. All your work is automatically saved.

Make sure you've opened this year's version of AZIPS.

The number of days left to submit will count down as a reminder.

Your OSPB analyst is available to help if you have questions on how to use AZIPS.
**Main Menu (continued)**

| **Update Plans** | *Update Plans* allows you to edit planning hierarchy elements. Information such as contact information, mission statements, descriptions, goals, objectives, performance measures, and funding (for unaligned agencies only) need to be reviewed and revised as necessary. New planning elements can also be added. |
| **Explore Plans** | *Explore Plans* provides an outline of your planning elements in a hierarchy. Hierarchical levels can be visible or hidden, and you can quickly navigate through your plan without drilling through hierarchy levels, one level at a time, as you do when using *Update Plans*. *Explore Plans* allows you to “jump” to any part of your plan, making it easy to update and review information. *Explore Plans* also allows the rapid reorganization of goals, objectives, and measures within the hierarchy. Within *Explore Plans*, the *Move Mode* allows for reorganization of specific planning elements using a step-by-step approach. The hierarchy levels are additive in nature (relational), building from programs at the highest level to performance measures at the lowest level of the hierarchy; therefore, movement is restricted by the relationship of the items in the hierarchy. A *Delete Mode* is also available. |
| **5-Year Strategic Plan** | *5-Year Strategic Plan* allows you to enter agency-wide strategic issues, strategies for addressing these issues, and resource assumptions for the three years not contained in BUDDIES. |
| **Reports** | ✓ Master List  
✓ Agency List  
✓ Budget Measures  
✓ Plan Funding*  
✓ Revised PM Descriptions  

*The Plan Funding report is only available to the few unaligned agencies.
### Main Menu (continued)

<table>
<thead>
<tr>
<th>Check Data</th>
<th>Check Data provides a preliminary check of the AZIPS data prior to submitting to OSPB. It is important to still review your reports to be sure everything looks complete.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Planning Survey</td>
<td>The OSPB Planning Survey allows you to provide feedback on all aspects of planning, from training/support to ease of using the application.</td>
</tr>
<tr>
<td>Send to OSPB</td>
<td>The Send to OSPB button routes your data to OSPB. Data file submittals are required with every hardcopy submittal, including all revisions.</td>
</tr>
<tr>
<td>Utilities</td>
<td>The Utilities button finds where the application data and your copy of the program files are located, makes copies of your data file as a backup, and provides instruction on how to add additional users to your application. You may be instructed to open the administrative features during a call from OSPB System Support.</td>
</tr>
<tr>
<td>Exit</td>
<td>Exit will automatically save all your work and close the application properly.</td>
</tr>
</tbody>
</table>
**Update Plans, Agency Information**

*Update Plans* forms have a top and bottom half. The top half of the form shows the information about the currently selected planning element. The bottom half of the form shows the planning element(s) in the next level of the hierarchy.

Review the completed fields and update as necessary to ensure the information is current. **Update for clarity and conciseness as these fields are published in both the Master List and the Executive Budget Recommendation.** These descriptions should be consistent with the agency-wide mission and description.

Use the following editing conventions to ensure conformity across all agency submittals—A.R.S., Ch., Art., Title xx, A.R.S. § xx-xxx (no space between the title and section of law).

The *Agency Information* form shows *Programs* down below if the agency has multiple programs or it will simply show *Goals* if the agency has only one program.

Click inside any of the gray boxes to select a planning element in the lower level of the hierarchy.
The **Funding** button is:
Disabled on all forms when your BUDDIES and AZIPS structures are aligned; Enabled for unaligned agencies and does not turn green until all program or subprogram funding is completely entered.

**Main Menu** returns to the Main Menu.

**Master List Report** will produce a printout in the format published in the Master List of State Government Programs, which is typically a subset of the information entered by the agency (excludes objectives and only prints measures selected to be published).

**Agency Report** will produce a printout of all planning elements in AZIPS.

**Funding** leads to the form for entering funding data at either the program or subprogram level (only for unaligned agencies).

**Close** returns to the planning element in the higher level of the hierarchy.

Multiple-program agencies will see the next planning level, **Programs**, in the bottom half of the form.
Single program agencies will see the next planning level at the bottom half of the form (Goals).

The application requires that goal statements begin with the word "To". A reminder will appear if you try to begin a goal statement with any other word.

Click a gray button to select a specific goal to review/update.

Click to create a new goal. Goals can only be deleted from the Goal Information form.
Please use spell check on each text field to ensure accuracy. From the menu, click **Tools, Spelling**. Spelling can be checked on every form, not just on **Full Screen**.

**Full Screen** mode expands the size of the text boxes for data entry (top half of form). This makes it easier to see what you have written.

You can also work in Word or similar software, and copy/paste your text into AZIPS.

The **Full Screen** button is a toggle button that turns full screen mode on and off.

When **Full Screen** mode is on the background color is green.

You’ll need to turn **Full Screen** mode off before you can navigate to other hierarchy levels.

For agencies that have multiple subprograms, a small number of them may need to have a performance measure at the program level that encompasses more than one subprogram. These can now be entered as performance measures on this page.
Update Plans, Program/Subprogram Goals

Click the gray button to the left of a goal’s name to select that goal.

Goals will be displayed on one of the following forms:
- Subprogram Information form if appropriate.
- Program Information form if the program does not have subprograms.
- Agency Information form if it is a single program agency.
Goals should clarify the program’s mission and description. The relationship between the goal and the description should be clear to the reader and should be supported by practical evidence of that relationship (that is, there must be some evidence to show that the goal and description are related). The number of program goals will be determined by the characteristics, breadth, and depth of the program’s mission and description.

If an objective or performance measure needs to be moved to another program or subprogram before the goal can be deleted, use the Explore Plans form.

Use caution when deleting goals. Deleting an existing goal will also delete all items below it in the hierarchy (objectives and performance measures).

Click to create a new objective. Objectives can be deleted on the Objective Information form.

Click to select an objective. Click to create a new goal. Each goal must contain at least one performance measure but objectives are optional.
Use caution when deleting objectives. Deleting an existing objective will also delete ALL items below it in the hierarchy (performance measures).

If a performance measure needs to be moved to another objective before the objective can be deleted, use the Explore Plans form.

Goals don’t tend to change, but objectives may change from year to year as you work toward the goal and accomplish your objectives.

Objectives will not appear on the reports if one of the following applies to the Descriptions:
1. Are left blank
2. Only have a space(s)
3. Contain the word ‘Default’
There should be at least one performance measure that is publishable in the Master List for each goal.

Flag the measures that should be published in the Master List. If a measure is not checked, it will still appear in the Agency List report.

Create a new performance measure.

You can delete a measure as long as it is not marked as a Budget Measure.

- If to be determined (TBD) or baseline is used for an estimate, please provide an explanatory footnote.
- Dollar ($) and percent (%) signs are not allowed in the performance data area.
- Use commas in numbers. Express large numbers in thousands or millions with one decimal place.
- Users will be limited to ten (10) characters in the data fields.

If necessary, use this field to provide an explanatory footnote about the performance measure. Please be succinct and accurate, as this will be published in the Master List. This is an optional field.
Use the drop down menu to select the Type of performance measure:

- **IP** = Input
- **OP** = Output
- **OC** = Outcome
- **EF** = Efficiency
- **QL** = Quality

Make sure the **Performance Measure Description**, in absence of the data, is intuitive and clearly describes what is being measured.

Remember that select measures are published in the Executive Budget and should be clear on their own and not require the reader to reference the corresponding program or subprogram.

If the measurement amounts are in thousands, be sure to clarify that in the description.

If necessary, use this field to provide an explanatory footnote about the performance measure. The explanation will be provided on the **Agency List** report. This is an optional field. This field is a good reference for questions and helps OSPB analysts. Let OSPB know if this measure should be considered a **Budget Related** measure.
Performance measures marked with the **Budget Related** flag have been selected for inclusion in the Executive Budget Recommendation.

The descriptions for budget measures are “locked” to prevent any changes, and these measures cannot be deleted from AZIPS. Agencies are also prohibited from flagging (adding) new budget measures.

Performance data is required for all budget measures.

A yellow background indicates that the description can’t be changed directly because it is budget related. It can be changed if it is white and not budget related.
Agency budget (BUDDIES) and planning (AZIPS) structures that are aligned will not be required to submit AZIPS financial information.

The AZIPS database has flagged those agencies that have aligned structures and will make the Funding button enabled as appropriate.

Funding for unaligned agencies needs to be entered for:
* FY 2022 Actual Expenditures
* FY 2023 Appropriations and Expenditure Plans
* FY 2024 Budget Request

Appropriated, non-appropriated, federal funds, and FTE positions should match or align at the agency level to what is reported in BUDDIES and CLIFF.

<table>
<thead>
<tr>
<th>Agencies required to provide financial information in AZIPS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Arizona Health Care Cost Containment System</td>
</tr>
<tr>
<td>Board of Regents (but, not the universities)</td>
</tr>
</tbody>
</table>
The Funding button will turn green to indicate that you’re at the correct hierarchical level to enter the fund amounts for this program or subprogram.

Red means the program has subprograms in the hierarchy so you must go to a lower level. The Plan Funding report summarizes all the subprogram funding entered.

Green means funding should be entered because you’re at the subprogram level, or you’re at the program level and no subprograms exist.

All numbers must be expressed in thousands and rounded to hundreds, with the exception of FTE Positions.

These numbers should also correspond and reconcile to BUDDIES for each fund.
Summary of Features

*Explore Plans* has three features for managing your work. Each of these features will be explained in detail on the following pages.

1. Outline Your Planning Elements
2. Review and Edit Selected Elements
3. Reorganize Planning Elements
Outline Your Planning Elements

*Explore Plans* displays your planning elements in the hierarchy. Hierarchical levels can be made visible or hidden. Each planning level is color coded.

The pink area will list only the planning levels that are currently selected to be visible.

In this example, all levels are listed because all levels were selected to be displayed below.

The five planning level buttons determine what is displayed. All levels below the selected button are hidden.

Since PMs are the lowest level, all levels and planning elements are displayed.

For example, if you click *Goals, Objectives and Performance Measures* will be hidden.

You can change colors if the default colors for the five levels are hard to see.

Notice the five planning level buttons display the colors they are set to and these colors are used when listing your planning elements below.

All planning element names are prefixed with the initial of the planning level followed by the number of the element within the level.
Review and Edit Selected Elements

You can quickly navigate through your plan elements without drilling through hierarchy levels, one level at a time, as you do when using the Update Plan forms. This lets you “jump” to any part of your plan making it easy to update and review.

Double-clicking buttons to the far left open selected plan elements.

A footnote describes how the planning element buttons should be clicked.

Once you finish reviewing or editing a planning element, simply close it to return to the Explore Plans form.
Reorganize Planning Elements

This form is useful for reordering your goals, objectives, and performance measures. It is also extremely helpful for agencies that have made program structure changes because it aids in the movement of planning elements without losing any history. Goals, objectives, and measures can be moved by following these steps:

1. Click Move Mode to enable the feature.
   AZIPS will pop-up a reminder of how to move items.

2. Select a goal, objective, or performance measure to move by clicking the check box to the left of the text (check boxes appear after Move Mode is enabled).

3. Select the goal, objective or measure where you want to move the planning element under/after by clicking the gray button in column '*' of the form.
   If needed, click Clear to erase all selections and start step #2 again.

4. Click Execute to move the checked item to its new position in the organization. An “x” will appear to the left of the moved item. Review the “x” item to ensure the proper placement.
   If there are other items to move, click Clear and repeat steps 2 – 4 until all items are moved.

5. Click Save to confirm all change(s) that used the Execute button or click Cancel to return items to their location at the last save.

Note: The pink area indicates Move Mode is now enabled.
Reorganize Planning Elements

Here is an example of reordering a performance measure.

1. Click Move Mode and click OK on the reminder message that pops up.

Check P12 as the items to be moved.

Single-click on P11 to designate it as the location where P12 is to be moved after.

2. Click Execute.

Review the move (Cancel lets you reselect before moving).

OK moves the checked item after the item with the depressed button.

3. Look for the item with an ‘x’ prefix to determine where your checked item was moved to. If the location is wrong, move the item again before saving.

Click Save and confirm your action. The ‘x’ prefix is removed and Move Mode is disabled.
Reorganize Planning Elements

Planning elements can be deleted following these steps.

1. Click *Delete Mode* to enable the feature.

AZIPS will pop-up a reminder of how to delete items.

2. Select a goal, objective, or performance measure to delete by clicking the check box to the left of the text (check boxes appear after *Delete Mode* is enabled).

Reselect or click *Clear* to unselect items.

**Agencies cannot delete programs or subprograms.**

3. Click *Execute* to delete the checked item(s) and confirm your action.

If there are other items to delete, repeat steps 2 – 4 until all items are deleted.

4. Click *Save* to confirm all deletions or click *Cancel* to return items to their location since the last save.
Reorganize Planning Elements

Here is an example of deleting a goal.

**This feature should be used with care due to the hierarchy of the planning levels.**

For example, if a goal is deleted, the objectives and performance measures associated with it will also be deleted.

If a goal was selected to be removed, as shown here, the associated objectives and performance measures would be deleted as well.

If an objective was selected to be removed, all associated performance measures would be deleted.

Only a performance measure can be removed one item at a time.

Be sure to look carefully at what is actually checked before clicking *Execute*. 
Select one or more programs/subprograms to report on. The Master List will automatically report on all programs.

**Reports**

Print the Master List information for OSPB.

At least one program must be selected before running one of these reports.
Select the **Agency List** report to review all AZIPS planning elements, including those elements not included in the Master List report, such as:
- Planning Objectives
- Performance Measures not flagged as ML

Use the **Budget Measures** report to review which performance measures are going to be published in the Executive Budget.

For unaligned agencies:

The **Plan Funding** report aids in ensuring AZIPS financial data is reconciled to BUDDIES financial data.

Any change to BUDDIES after the September submission may require a revised AZIPS submission.

**Not in Master List** shows all goals without any performance measures marked as being included in the Master List.
Saving reports provides a means for sharing information with others in the organization that do not have AZIPS.

When a report is opened a *report menu-bar* will appear at the top of the window with three buttons. *Print* will print a hardcopy and *Close* will return you to the form.

The *Save Report* button will pop-up a dialog. This gives you the ability to save the report as a file in any location. You can then share the report with others by emailing it as an attachment or letting them know where it is on a shared network drive. Others can view it without the AZIPS application.

They do need Microsoft Access installed but do not need to know how to use Access. Access simply displays the report as a static image that cannot be changed.
The reports have been designed to have small fonts because of the volume of pages for printing/publishing, especially at the state level.

When you open a report for preview, the page will usually be set to fit it on the screen. The cursor will be a magnifying glass with a plus sign in it.

*Left-clicking* on the report will zoom it to 100%. The cursor will become a magnifying glass with a minus sign in it.

*Right-clicking* on the report, lets you zoom to other sizes. You can also enter any zoom size, instead of picking from the list.

This *Zoom* feature also works for people who do not have the application and are reading the reports you created using the *Save Report to File* feature (see previous page). Let others know when they see your reports in Snapshot Viewer that they can zoom.
The Check Data form can be run from the Main Menu.

It automatically runs when you pick Send to OSPB.

When all required data checks pass, a message will confirm it.

Agencies must still review the reports to be sure everything is accurate and complete.

A checkmark indicates that the data check has passed.

In this illustration, all data checks have passed.
AZIPS can only check some of the basic requirements.

The first five checks must pass before you are allowed to submit a data file to OSPB.

If a data check does not pass, an error or warning message will appear below with a button. The button will display the details of what needs to be addressed.

In this illustration, none of the data checks have passed.

A warning will not prevent you from submitting, but goals without performance measures for the *Master List* will be questioned by OSPB before publishing.

| All programs and subprograms have an entry in the 'Statute' field: |
| **ERROR:** You have at least one statute missing. Click on the button to enter the missing statute(s). |

| You have at least one strategic issue: |
| **ERROR:** You must have entered at least one strategic issue in your plan. Click the button to add one. |

| All goals have a description: |
| **ERROR:** Every goal must have a description. Click the button to list these goals. |

| All goals have at least one performance measure: |
| **ERROR:** Every goal must have at least one performance measure. Click to list goals missing PMs. |

| All performance measures have a type and amounts: |
| **ERROR:** Every PM must have a type & all amounts must be entered. Click the button to list these PMs. |

| All goals have at least one Master List performance measure: |
| **WARNING:** Every goal should have at least one measure with a checkmark for Master List. Every goal should be measurable when published. Click the button to list these goals. |
Before submitting a data file, complete the *Contact Information* form. This should be the person transmitting AZIPS to OSPB.

OSPB will send an email upon receipt of the file. There will also be an email with each revision transmitted.

All fields are required.

**Contact Information**

*Agency:* Arizona Health Care Cost Containment System

- **Name:**
- **Email:**
- **Telephone:**

Please fill in your contact information so OSPB can reply with a status on your submittal.

Contact OSPB if you do not receive an email within one business day confirming your data file submittal.
Please complete the survey.
Responses to surveys are used to make improvements to the application for future years.

Alternative methods are still available, but eFile is the fastest and easiest way to send your electronic data.

An electronic submittal is required with each revision.

Office of Strategic Planning and Budgeting
AZIFS Submitted
1700 W Washington, Suite 600
Phoenix, AZ 85007
Phone: (602) 542-5381

The statutory due date is 9/1/22. You have 78 days remaining.
Requests for filing extensions from OSPB must be made by 8/15/22.

For technical support:
Tao Jin
(602) 475-7182
tjin@az.gov

Notes:
Agencies must send two hardcopies; A.R.S. § 35-113. In addition, the data file must be received on time.
Data files must be resubmitted each time you send hardcopies for revisions.

This system includes data for fiscal years 2022 through 2024

Send to OSPB
The Planning Survey responses help our office continuously improve our instruction, support, and AZIPS application.
The AZIPS Utilities offer the following features:

- Find where the application data and your copy of the program files are located.
- Make copies of your data file as a precaution (very quick and easy).
- Get instruction on how to add additional users to your application.
- You may be instructed to open the Administrative Use features during a support call from OSPB System Support.

Who do I call to get help?

If assistance with any aspect of the submission is needed, please contact your agency’s assigned OSPB analyst. To determine which OSPB analyst is assigned to an agency, either call OSPB’s central office at (602) 542-5381 or look at the OSPB agency assignment list. Agencies should have the instructions available so information may be referenced easily. Assigned analysts help with how to use AZIPS and provide assistance in selecting meaningful measures for the Master List of State Government Programs.

What is AZIPS?

The Arizona Integrated Planning System (AZIPS) is the information collection tool for the Master List of State Government Programs publication and agencies’ five-year strategic plans. All agencies are required to use this automated application for their submission.

How do I get the AZIPS applications?

The AZIPS application and installation instructions are available on OSPB’s website here.
What do I submit on the due date?

The electronic submission, plus two hard copies of the Master List report from AZIPS. **OSPB will distribute the two hard copies.**

Where do I submit?

Agencies should send both copies to: Governor’s Office of Strategic Planning and Budgeting
1700 W. Washington
6th Floor, Executive Tower
Phoenix, AZ 85007

What happens if I need to submit a revision?

Agencies should notify their OSPB analyst as soon as it becomes apparent that a revision must be made. Revisions should be submitted on colored paper. Write “Revision” and the date on the bottom left-hand corner with the same number of copies as the original submission (two hard copies).

**Important Note**

Any revision to BUDDIES for *unaligned* agencies will likely require a revision to AZIPS to ensure the financial information in both applications is the same.

A data file submission must accompany every revision using the eFile method.

What other reference material is available to help in planning?

Publications are available from [OSPB’s website](#).
Note that AZIPS planning terminology and definitions are slightly different than those used by cabinet-level agencies in their 2-page strategic plan under the Arizona Management System (AMS).

**Budget Measures:** The *Executive Budget* publication is statutorily required to include selected performance measures. These measures are intended to reflect the agency’s performance of the functions for which it was created.

To provide continuity from year to year, OSPB “locked” the *Executive Budget* measures in AZIPS to ensure the measures will be reported in a consistent manner. Users cannot delete these “locked” measures, and must update them. Any changes to the wording of a locked measure (clarification or change of methodology for data collection) or the addition or deletion of a locked measure will follow a formal process, described below, that will require OSPB approval.

Agencies should use AZIPS to request additions, changes, or deletions from OSPB for budget related performance measures. This request is made by utilizing the *Revised Performance Measure Description* box on the *Performance Measure Information* screen for the budget related performance measure in question. In the request, be specific about how the new or revised measure should read. If a measure should be deleted, have the changed wording say, “This measure should be deleted.” In all cases, provide strong, specific arguments about why the change is necessary. OSPB will review the request and inform the agency of approved changes and make the necessary changes before publication.

For many cabinet agencies, there have been substantial changes to the Executive Budget measures since last year. If there are any questions about these changes, please contact your OSPB analyst.

**Description** — a summary of the major duties, responsibilities, and customers of the agency or program.

**Financials** — virtually all agencies have budget (BUDDIES) and planning (AZIPS) structures that are aligned and do not submit financial information in AZIPS. AZIPS knows which agencies require the input of financial information and which agencies do not. Only AHCCCS, Community Colleges, Judiciary, and the Board of Regents (but, not the universities) remain unaligned and need to reconcile their financials in AZIPS and BUDDIES.
Planning Terms (continued)

**Funding Information** — the four non-aligned agencies (meaning the budget structures in BUDDIES do not align with the planning structures in AZIPS) will need to enter the following information into AZIPS:

- A summary of total program and subprogram FY 2022 expenditures through the 13th month.
- FY 2023 appropriations and expenditure plans
- FY 2024 budget request for all funds

**Goals** — the desired end results, generally after three or more years. The program and subprogram operational plans should include goals that reflect strategic directions, any internal plans to increase efficiency or effectiveness, and primary activities.

**Mission Statement** — *a brief* statement of purpose that outlines the agency’s or program’s reason for existing. Mission statements should reflect the statutory authority for the existence of the agency or program.

**Performance Measures** — used to measure results. Performance measures provide a basis for benchmarking the program’s and subprogram’s goals. Agencies should choose key outcome-oriented measures for inclusion in the *Master List*.

**Strategic Issues** — strategic issues are the key challenges or special circumstances (problems) facing the agency. Strategic issues often develop in response to resource limitations, new alliances, customer concerns, court decisions, audits, or other factors. Note: *Issues are problems, not goals.*

**Strategies** — how an agency plans to address a strategic issue.

**Submittals** — besides the electronic submissions, agencies must provide two hard copies. OSPB will notify you when your agency’s data has been received. Revisions also require the same number of hard copies as well as an updated electronic submission of the data. For the four agencies that enter their financials in both AZIPS and BUDDIES, a revision from BUDDIES may require a corresponding update and revision in AZIPS. Submittal instructions are included on page 42.
Resource Assumptions — agencies need to project resource needs for FY 2025 through FY 2027; OSPB will use the agency’s requested budget amounts in BUDDIES to be the resource assumptions for fiscal years 2023 and 2024.
